Aman Kumar Singh

Full Stack Developer (MERN) | Node.js & Backend Engineering
+91 7272950156 | amankrsingh6001@gmail.com | linkedin.com/in/aman-kr-singh08 | github.com/amankrsingh2001

Summary

Full Stack Developer with 1.7+ years of experience building production backend services and React/Next.js applications. Skilled in Node.js, Express.js, REST API design, JWT authentication, Redis, and cloud deployment on Azure, with hands-on experience delivering real-time features using WebSockets.

Professional Experience

Sarv.com Jul 2026 – Present
Software Engineer (Full Stack Developer) *Jaipur, India*

- Working as a Software Engineer at a product-based company, building and shipping features for real-world, live production applications used by end customers.
- Collaborating with cross-functional teams to design, develop, and maintain scalable full-stack features using **Node.js**, **React.js**, and REST APIs.
- Developing backend services, API integrations, and frontend workflows while focusing on performance, reliability, and maintainable code.
- Contributing to feature development, debugging, testing, and production issue resolution across the application lifecycle.

Bluetris Technologies May 2025 – Jul 2026
Full Stack Developer (React / Next.js / Node.js)

- Built a serverless **Azure Function App** to parse and validate XML voyage data and upload processed output to **Azure Blob Storage**, reducing manual data-review effort.
- Built 10+ reusable, responsive UI components with **React**, **Next.js**, TypeScript, and Tailwind CSS, improving user engagement by approximately 35–45%.
- Implemented **Redis**-backed authentication and session management for secure token storage and reliable handling of concurrent user sessions.
- Reduced initial page load time by approximately 20–30% through lazy loading and code splitting, and built real-time data-sync features using **WebSocket** and Redis pub/sub.

Lonex Technologies Nov 2023 – May 2025
Full Stack Developer (React.js / Node.js)

- Engineered RESTful APIs with **Node.js** and **Express.js** to power reliable data exchange between frontend and backend services across multiple product modules.
- Implemented **JWT**-based authentication and role-based access control (RBAC), and integrated third-party APIs and payment gateways to extend product functionality.

Projects

ClassNotion – Ed-Tech Platform | *React.js, Redux Thunk, Node.js, Express, MongoDB* Live Demo | GitHub

- Built a full-stack Ed-Tech platform serving 1,000+ users with course creation, enrollment, and progress tracking.
- Designed a secure **Express.js** backend with **JWT** authentication and **Bcrypt**, and integrated Razorpay for payments with approximately 98–99% transaction success rate.

Tracker-Pro – Expense Tracking App | *React.js, Next.js (SSR), Prisma, PostgreSQL, JWT* Live Demo | GitHub

- Built a full-stack expense-tracking app with **Next.js (SSR)** and optimized API routes, improving performance by approximately 25–35%.
- Integrated **Prisma ORM** with PostgreSQL and **JWT**-based authentication; deployed on Vercel with approximately 98–99% uptime.

Skills

Languages: JavaScript, TypeScript, SQL
Frontend: React.js, Next.js, Redux Thunk, Tailwind CSS, HTML5, CSS3
Backend: Node.js, Express.js, REST API Design, WebSocket, Serverless Architecture
Auth & Security: JWT, Bcrypt, RBAC, Redis-backed Session Management
Databases: MongoDB, PostgreSQL, Azure SQL Database, Prisma, Mongoose
Cloud & Tools: Azure Blob Storage, Azure Function Apps, Git, Postman, Vercel, CI/CD

Education

Arya College of Engineering and IT 2019 – 2023
Bachelor of Technology in Electronics and Communication *Jaipur, Rajasthan*

Certifications

Full Stack Development – Udemy
